

Nilesh Mishra

Backend & API Engineer | BE Computer Science | MSU Baroda

+91 8460805733 · nileshmishra2508@gmail.com · [LinkedIn](#) · [GitHub](#) · [LeetCode](#)

PROFESSIONAL SUMMARY

Backend and API-focused engineer with hands-on experience in **C#/.NET**, **Node.js/Express.js**, and **REST API** design across MERN and .NET stacks. Proficient in **SQL** (PostgreSQL, MSSQL) and **NoSQL** (MongoDB) databases, **OOP** principles, **MVC** architecture, and real-time systems. Experienced in Agile/Scrum workflows, API caching strategies, unit testing, and writing clean, documented, production-grade code. BE Computer Science graduate (CGPA 8.33) with 500+ LeetCode solutions demonstrating strong DSA fundamentals.

TECHNICAL SKILLS

Languages & Paradigms: C#, JavaScript (ES6+), Java, C++, Python | OOP, SOLID Principles, MVC Architecture
Backend & API: ASP.NET Core, .NET Framework, Node.js, Express.js, Spring Boot | REST APIs, SOAP, GraphQL, AJAX
Databases: MSSQL (SQL Server), PostgreSQL, MySQL (*SQL*) | MongoDB, Mongoose ODM (*NoSQL*)
API & Integration: JWT Authentication, Razorpay API, Twilio API, Nodemailer, Postman, Third-Party Integration
Real-Time & Performance: Socket.IO, WebRTC, API Caching Strategies, Lazy Loading, Performance Optimisation
Frontend: React.js, Redux, jQuery, MUI, HTML5, CSS3, Bootstrap, Tailwind CSS, GSAP, Responsive Design

EXPERIENCE

- Software Engineer Intern** Jan 2026 – Present
STPLGlobal
- Designed and optimised **C++ backend modules** for image-processing software, improving processing efficiency by **20%+** through targeted algorithmic enhancements and memory management — mirroring API performance optimisation practices.
 - Participated in **code reviews, functional testing, and technical documentation** across Agile/Scrum release cycles, ensuring code quality and system reliability via Git-based workflows.
 - Wrote and maintained comprehensive **documentation** for program logic, testing procedures, bug fixes, and release changes.
- Web Development Intern** May 2025 – Jun 2025
Sparks To Ideas
- Built and delivered responsive client-facing web applications using **React.js, jQuery, HTML5, CSS3, and Bootstrap** with GSAP animations; applied **lazy loading and asset caching** for improved multi-device performance.
 - Followed structured **SDLC methodology** and managed source control with Git throughout the full project lifecycle.

PROJECTS

- QuizChamp** – Real-Time Quiz Platform | *C#, ASP.NET Core (MVC), PostgreSQL, React.js, Socket.IO, JWT*
- Designed and developed a **C#/ASP.NET Core REST API** backend following **MVC architecture** with **PostgreSQL** for structured data storage — directly aligned with .NET and SQL requirements.
 - Implemented **JWT-secured authentication**, real-time quiz delivery with timer sync via **Socket.IO**, auto-grading, CSV/PDF question bank ingestion, and live leaderboard for teacher-student workflows.
 - Integrated **API caching** for leaderboard and quiz state to reduce database load and response latency; delivered automated result email notifications.
- CampusConnect** – Recruitment Platform | *Node.js, Express.js, MongoDB (NoSQL), React.js, WebRTC, Socket.IO, JWT*
- Built a full-stack **Node.js/Express.js REST API** with **MongoDB (NoSQL)** backend supporting student, company, and coordinator roles — demonstrating both SQL and **NoSQL** database design expertise.
 - Implemented real-time video interviews via **WebRTC** and live event broadcasting with **Socket.IO**; role-based access with JWT and automated email notifications via Nodemailer.
 - Developed admin analytics dashboard with applicant pipeline management; wrote **unit tests** and maintained API documentation for all backend endpoints.
- Online Mortgage Application System** | *Spring Boot, React.js, PostgreSQL, Razorpay API, Twilio API*
- Developed secure **REST API** backend with Spring Boot and **PostgreSQL**; integrated **Razorpay API** for EMI payment processing and **Twilio API** for OTP-based two-factor authentication.
 - Implemented loan eligibility logic, automated interest computation, and role-separated dashboards — showcasing complex **business logic implementation via APIs**.

EDUCATION

- Faculty of Technology & Engineering, MSU Baroda** 2022 – 2026
B.E. Computer Science & Engineering | CGPA: 8.33
- St. Xavier's High School, Surat | HSC: 82.3%** **Sharda Yatan High School | SSC: 88.33%** 2022 / 2020

CERTIFICATIONS & ACHIEVEMENTS

- Solved **500+** **LeetCode** problems — **365-day badge**, **270-day streak**, **65%+** acceptance rate; demonstrates strong **DSA and problem-solving** fundamentals essential for API and backend engineering.
- **Odoo × MSU Footprint Hackathon** — end-to-end software product development under time-constrained, team-based conditions.
- **Software Engineering** – Coursera: SDLC, Agile methodology, and software engineering best practices.
- **Data Science for Engineers** – NPTEL: data handling, visualisation, and ML basics.
- **Frontend Development** – Coursera: HTML, CSS, JavaScript, and responsive design.
