

NILESH MISHRA

Full-Stack Developer | Associate Software Engineer

+91 8460805733 • nileshmishra2508@gmail.com • [LinkedIn](#) • [GitHub](#) • [LeetCode](#)

PROFESSIONAL SUMMARY

Motivated Associate Software Engineer with hands-on experience building full-stack web applications using the **MERN stack** (MongoDB, Express.js, React JS, Node.js) alongside Java, C++, and C#. Proven ability to write well-designed, testable, and efficient code while integrating components into fully functional systems. Experienced in real-time features (Socket.IO, WebRTC), REST API design, and third-party API integration. Comfortable with Git-based workflows, Agile/Scrum methodology, and industry coding standards. BE Computer Science graduate (CGPA 8.33) with 500+ LeetCode solutions.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Java (OOP), C, C++, C#, TypeScript
MERN Stack:	MongoDB, Express.js, React JS, Node.js, Mongoose ODM, REST API Design
Frontend:	HTML5, CSS3, Bootstrap, Tailwind CSS, React JS, jQuery, GSAP, AOS, Responsive Design
Other Frameworks:	.NET Framework, Spring Boot
Databases:	MongoDB, MySQL, PostgreSQL, SQL Server, Mongoose
Real-Time & APIs:	Socket.IO, WebRTC, Nodemailer, Razorpay API, Twilio API, REST APIs
DevOps / Tools:	Git, GitHub, Postman, Render, Appwrite, Jupyter Notebook
Concepts:	OOP, SOLID Principles, Agile/Scrum, SDLC, DSA, REST API, Clean Code
Soft Skills:	Problem Solving, Communication, Teamwork, Clean Coding

EXPERIENCE

Software Engineer Intern | STPLGlobal

Jan 2026 – Jun 2026

- Optimised C++ modules for image-processing software, improving processing efficiency by 20%+ through targeted performance enhancements.
- Enhanced image-processing functionalities — contributing to feature development, performance optimisation, and desktop application stability.
- Assisted in debugging, functional testing, and documentation across release cycles following Agile/Scrum methodology and Git-based workflows.

Web Development Intern | Sparks To Ideas

May 2025 – Jun 2025

- Developed responsive, modern websites using **HTML5, CSS3, Bootstrap, and JavaScript**; integrated AOS and GSAP animations for smooth, engaging user interactions across multiple client projects.
- Applied performance best practices including lazy loading and image optimisation for faster page delivery on multiple devices.
- Managed source code using **Git** and followed structured SDLC methodology and release processes throughout the project lifecycle.

PROJECTS

CampusConnect – Campus Recruitment Platform

MERN Stack (MongoDB, Express.js, React JS, Node.js) • Socket.IO • WebRTC • Nodemailer • JWT • GitHub Actions

- Built a full-stack campus recruitment platform using the **MERN stack** — Node.js / Express.js REST API backend with MongoDB (Mongoose ODM) and React JS frontend — supporting roles for students, companies, and coordinators.
- Enabled job posting, candidate shortlisting, and interview scheduling; implemented **real-time video interviews via WebRTC** and live event broadcasting with **Socket.IO**.
- Students can filter jobs, upload resumes, and auto-generate interview questions; coordinators can onboard companies and manage applicant pipelines.
- Built an admin analytics dashboard and integrated **Nodemailer** for automated selection email notifications — ensuring responsive, secure, and scalable architecture across all user roles.

Online Mortgage Application System

Spring Boot • React JS • PostgreSQL • Razorpay API • Twilio API

- Built a secure mortgage platform for loan application, payment processing, and user verification — with a **Spring Boot** REST API backend and **React JS** frontend.
- Integrated **Razorpay API** for seamless EMI payment processing and **Twilio API** for OTP-based user authentication.
- Implemented loan eligibility checks, automated interest computation, and dynamic dashboards for both applicant and admin workflows.
- Ensured a responsive, reliable, and secure user experience across all workflows from design to deployment following full SDLC.

QuizChamp – Real-Time Quiz Hosting System

C# • ASP.NET Core • Svelte.js • PostgreSQL • Socket.IO • JWT

- Built a platform where teachers create quizzes, upload CSV questions, and track students via a **live leaderboard** — using C# / ASP.NET Core backend with Svelte.js frontend.
- Enabled real-time quiz delivery with live tracking, timer sync, diverse question types, and auto-grading via **Socket.IO**.
- Implemented topic-wise MCQ generation from PDFs and user input, performance analytics, leaderboard, and dashboards.
- Executed user authentication with JWT, emailed results via automated notifications — ensuring a secure, responsive, and scalable design.

EDUCATION

B.E. Computer Science Faculty of Technology & Engineering, MSU Baroda	2022 – 2026 CGPA: 8.33
HSC St. Xavier's High School, Surat	2022 82.3%
SSC Sharda Yatan High School	2020 88.33%

CERTIFICATIONS & ACHIEVEMENTS

- Solved **500+ LeetCode problems** with a 365-day badge and a 270-day streak — 65%+ acceptance rate.
- Participated in **Odoo x MSU Footprint Hackathon** — team-based software development under time-constrained conditions.
- **Data Science for Engineers** – NPTEL: Data handling, visualisation, and ML basics.
- **Frontend Development** – Coursera: HTML, CSS, JavaScript, and responsive design.
- **Software Engineering** – Coursera: SDLC, Agile, and software engineering best practices.
- **Communication Skills** – FFE: Effective verbal and written communication.
