

NILESH MISHRA

Associate Software Engineer | Full-Stack .NET & Java Developer

+91 8460805733 • nileshmishra2508@gmail.com • [LinkedIn](#) • [GitHub](#) • [LeetCode](#)

PROFESSIONAL SUMMARY

Motivated and passionate software engineer with hands-on experience in full lifecycle software development using C# (.NET), Java, C, C++, and relational databases (MSSQL / PostgreSQL). Proven ability to write well-designed, testable, and efficient code while integrating software components into fully functional systems. Experienced in building interactive web applications with ASP.NET Core, MVC, and RESTful APIs. Familiar with Agile/Scrum methodology, Git-based release processes, test-driven development, and industry coding standards. BE Computer Science graduate (CGPA 8.33) with 500+ LeetCode solutions, actively seeking an Associate Software Engineer role to contribute and learn emerging technologies.

TECHNICAL SKILLS

Languages	Java (OOPs) , C , C++ , JavaScript ,C# (.NET),TypeScript
Web Frameworks	Node.js, Express, React JS ,ASP.NET Core, ASP.NET MVC,.NET 6/7/8
Frontend	HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, GSAP, AOS, Responsive Design
Databases	MSSQL (SQL Server), PostgreSQL, MySQL, MongoDB, Entity Framework Core, T-SQL
APIs & Services	RESTful API Design & Consumption, Razorpay, Twilio, Nodemailer, WebRTC
DevOps / CI-CD	Git, GitHub, GitHub Actions, Azure DevOps (basic), Render
Tools	Postman, Visual Studio, Jupyter Notebook, Socket.IO, Appwrite
Concepts	OOP, SOLID Principles, Agile/Scrum, SDLC, Design Patterns, TDD, DSA, Code Review

EXPERIENCE

Software Engineer Intern | [STPLGlobal](#) | Jan 2026 – Jun 2026

- Executed full lifecycle software development of C# / .NET modules for an image-processing desktop application, improving processing efficiency by 20%+ through targeted code optimisation.
- Wrote well-designed, testable, and efficient code following established coding standards; integrated software components into the existing application system under senior guidance.
- Participated in debugging, functional testing, and documentation of software functionality to ensure feature stability across release cycles.
- Collaborated with development team to understand requirements, comply with project plans, and deploy software tools and updates on schedule using Agile methodology.

Web Development Intern | [Sparks To Ideas](#) | May 2025 – Jun 2025

- Designed and developed interactive, responsive web applications using HTML5, CSS3, Bootstrap, and JavaScript for multiple client projects — demonstrating hands-on knowledge in designing interactive applications.
 - Integrated third-party APIs and animation libraries (AOS, GSAP); applied performance best practices (lazy loading, image optimisation) to produce fully performing software solutions.
 - Managed source code using Git, documented functionality, and followed a structured software development methodology and release processes throughout the project lifecycle.
-

PROJECTS

Online Mortgage Application System — *Spring Boot, React JS, PostgreSQL, Razorpay API, Twilio API*

- Built a secure, fully functional web application for loan processing, EMI payment management, and OTP-based authentication — complete SDLC from design to deployment.
- Designed relational database schema (PostgreSQL / MSSQL-compatible); wrote complex SQL queries for loan-eligibility checks, interest computation, and reporting.
- Integrated Razorpay payment API and Twilio SMS API — demonstrating proficiency in consuming and integrating third-party software components into a functional system.

CampusConnect – Campus Recruitment Platform — *MERN Stack, Socket.IO, WebRTC, Nodemailer*

- Developed a multi-role RESTful API web application; implemented real-time video interviews (WebRTC), automated email notifications, and admin analytics dashboards.
- Wrote testable, efficient code across all application layers; integrated authentication, scheduling, notifications, and video components into a cohesive, fully functional system.
- Managed the full project lifecycle independently — from requirement analysis and design to deployment — following Agile methodology, Git workflows, and release processes.

QuizChamp – Real-Time Quiz Hosting System — *C#, ASP.NET Core, PostgreSQL, Entity Framework Core, Socket.IO*

- Designed and developed a full-stack web application in C# / ASP.NET Core, applying OOP principles and SOLID design to build a maintainable, scalable service layer.
- Implemented relational database schema in PostgreSQL; performed complex T-SQL-style queries and managed schema migrations via Entity Framework Core ORM.
- Built interactive application features: real-time leaderboard, timer sync, auto-grading, MCQ generation from PDFs — demonstrating knowledge of interactive application design.
- Integrated JWT authentication, email notifications, CI/CD-compatible deployment; documented software functionality and followed Agile release processes throughout.

EDUCATION

B.E. Computer Science | Faculty of Technology & Engineering, MSU Baroda | 2022 – 2026 | **CGPA: 8.33**

HSC | St. Xavier's High School, Surat | 2022 | 82.3%

SSC | Sharda Yatan High School | 2020 | 88.33%

CERTIFICATIONS & ACHIEVEMENTS

- Software Engineering – Coursera: SDLC, Agile methodology, release processes, and software engineering best practices.
- Frontend Development – Coursera: HTML5, CSS3, JavaScript, responsive design, and interactive application development.
- Data Science for Engineers – NPTEL: Data handling, visualisation, and ML fundamentals.
- Communication Skills – FFE: Effective verbal and written communication in professional and team settings.
- Solved 500+ LeetCode problems (65%+ acceptance rate) with a 365-day badge and 270-day streak — demonstrating consistent, disciplined problem-solving ability.
- Participated in Odoo x MSU Footprint Hackathon — team-based software development under time-constrained conditions.
